Entertainment & Leisure

Birdair's expertise in the construction of tensile structures extends to the entertainment and leisure sectors, and is reflected in a variety of completed resorts, casinos and amphitheaters worldwide.

These venues are designed and engineered to encourage relaxation and celebration, ideals that reinforced aesthetically by the use of architectural fabric membranes. No other material is as versatile; a membrane roof can be contoured into just about any imaginable shape. In daylight, tensile membrane translucency offers soft diffused naturally lit spaces reducing the need for interior lighting. While at night, artificial lighting creates an ambient exterior luminescence.

When it comes to entertainment venues, the lightweight membrane provides a cost-effective solution requiring less structural steel to support the roof or façade, enabling long spans of column-free space. In addition, membrane offers facility owners reduced construction costs and maintenance costs compared to traditional building materials.

Arkansas Music Pavilion
Rogers, Arkansas USA

Texas State Amphitheater
Knoxville, Tennessee USA

MacDonald Island Park - Nexen Stage
Fort McMurray, AB Canada

Haddad Riverfront Park
Charleston, West Virginia USA

Functional Benefits of Membrane

- *Excellent Durability and Long Lasting*
- *Outstanding Light Transmittance*
- *Lightweight Structural Requirements*
- *Low Maintenance*
- *Signature Design Aesthetics*
- *Cost Efficient*
- *Code Compliant*

Birdair offers a selection of architectural fabric membranes, including PTFE fiberglass, ETFE film, PVC and Tensotherm™, an insulated and translucent tensioned membrane system.

San Jose Carousel
San Jose, California USA

Chicago Navy Pier
Chicago, Illinois USA

Belterra Park Grandstands
Cincinnati, Ohio USA

Who is Birdair?

Birdair is the leading specialty contractor for custom tensile membrane structures throughout the world.

With more than 55 years of experience, Birdair has worked with owners, architects, engineers and contractors to design and build custom tensile structures used to create innovative roofing systems, canopies and skylights. As a turn-key specialty contractor, Birdair provides pre-construction assistance; including design assistance, budgeting, construction methodologies and project schedule development.

Our in-house capabilities consist of design, engineering, fabrication, installation and maintenance. Working closely with architects and their clients, Birdair assists in delivering award-winning solutions by taking an idea and building an icon.
