Birdair, Inc. Awarded Red Bull Arena Contract

New Soccer Stadium to Receive State-of-the-Art Roof and Cladding Systems

BUFFALO, NY... Birdair, Inc., the leading specialty contractor of lightweight long-span roofing systems and tensile structures throughout the world, has been awarded the design-build contract to provide the roof and facade cladding systems for Red Bull Arena in Harrison, NJ.

As specialty subcontractor for the Major League Soccer stadium, Birdair's role will consist of engineering, fabricating and installing the roof and facade cladding systems for the 25,000-seat arena. As an integral design component, the contemporary, open-air roofing system and sleek exterior cladding will lend a variety of aesthetic and functional benefits to the world-class athletic facility upon completion.

"Due to the success of value engineering, we were awarded the project for the fabric roof and cladding systems," explains Kevin Mayer, vice president of business development for Birdair. "We were able to incorporate three different types of tensile membrane in the overall roofing system; it's exciting and innovative."

To date, Birdair has completed work on 65 sports facilities globally, incorporating tensile architecture into a variety of single-sport and multi-purpose stadiums and arenas. Birdair combines breakthrough technologies with unparalleled experience to create structures that meet both facility and patron requirements. Visit www.birdair.com to learn more.

About Birdair: Birdair, Inc. is the leading specialty contractor of lightweight long-span roofing systems and tensile structures throughout the world, providing design-build solutions for architects and clients in all aspects of project design, engineering, installation and maintenance. Lightweight long-span roofing systems and cable structures can be attached to any building envelope and offer aesthetic and functional options to complement any exterior design. Birdair, based in Buffalo, NY, is a member of the Taiyo Kogyo Group, with operations serving North and South America and other international locations.
