

New Atlanta Stadium to feature Multi-Layered ETFE Roofing System

Birdair has been selected as the specialty contractor for the roof pillow system and facade solution for the new Atlanta stadium. The new state-of-the-art facility, set to open in 2017, will feature a retractable roof consisting of three layered ETFE roof pillows on eight petals that retract, similar to a camera lens. The stadium, once completed, will be home to the NFL's Atlanta Falcons and MLS Atlanta, and will host concerts, conventions and other marquee sports and entertainment events. Recently naming rights for the stadium have been granted to Mercedes-Benz.

Versatile, Aesthetic and Durable. The Benefits of ETFE Film

Birdair's ETFE film is a durable, highly transparent, and sustainable tensile fabric suitable for a variety of architectural needs. Few building materials can match ETFE for its impact or presence when you want a structure that stands out from the crowd. With unmatched longevity and superior light transmission ETFE film, ETFE is the material of choice for traditional skylight applications to long span structures and building facades.
