Dedmon Center at Radford University:
the world's first insulated translucent membrane roof

Visit Birdair at Greenbuild, Booth #546

Don't miss Birdair at [Greenbuild International Expo](#) at the Phoenix Convention Center, November 11-13.

Representatives will be on hand at Cabot Corporation's Booth #546 to discuss groundbreaking new [Tensotherm™ with Nanogel®](#) – the world's first and only translucent insulated composite membrane roofing system.

[Tensotherm offers the same architectural beauty](#) as other tensile fabric membranes, but with the added benefit of a feather-light translucent Nanogel insulation layer that prevents loss of heated or cooled interior air. Diffused and glare-free daylighting reduces electric lighting requirements, while acoustic attenuation provides a quieter interior space. The material's energy saving benefits can already be witnessed at the [Dedmon Center](#) in Radford, VA, where Tensotherm has demonstrated superior thermal performance even beyond that of conventional roofing systems in the structure.

Learn more about the ways Tensotherm can contribute to LEED® certification when you pick up a copy of the new Tensotherm brochure at Greenbuild. Also visit www.birdair.com, email sales@birdair.com or call 1-800-622-2246.

Battery Park City Ferry Terminal Wins IFAI Award of Excellence

[The Battery Park City Ferry Terminal](#) recently earned an IFAI Award of Excellence in the [Fabric Structures](#) category for its stunning tensioned membrane canopy. Projects were submitted in 28 categories and evaluated for complexity, design, workmanship, uniqueness and functionality. [Birdair served as roofing sub-contractor for the terminal](#) – the largest of its kind in the US.

About Birdair

Birdair, Inc. is the leading specialty contractor of lightweight long-span roofing systems and tensile structures throughout the world, providing design-build solutions for architects and clients in all aspects of project design, engineering, installation and maintenance. Lightweight long-span roofing systems and cable structures can be attached to any building envelope and offer aesthetic and functional options to complement any exterior design. Birdair, based in Buffalo, NY, is a member of the Taiyo Kogyo Group, with operations serving North and South America and other international locations.
