PRECONTRAINT®
502
Textiles for solar protection

Main applications: façade blinds, awnings, shadesails, canopies, light structures, etc.

A unique coordinated range

The 40 colours in the Précontraint® 502 range have been specially created by the design department of Ferrari® with all industrial and architectural applications in mind. The adaptation to current and future colour trends and the addition of metallic finishes and interferential colours bestow enduring individual traits to every project.

This unique range is very closely coordinated with other Ferrari® products ranges and facilitates the harmonization of awnings to interior solar blinds, exterior canopy structures, facades and other textile coverings.

High-performance thermal protection

The wide colour range makes selection easy, to obtain required heat protection properties.

New formulations ensure high-performance thermal protection systems for window blind, shading fabric or canopy designs.

High heat-reflection capacities of certain colours can contribute to enhanced user comfort.

Enduring technical benefits

The full advantage of Ferrari® Précontraint® technology is reflected in the Précontraint® 502 range. It offers many advantages to every type of project: dimensional stability for shading fabrics; unmatched strength for canopies and large-sized applications; high UV resistance due to rigorous choice of pigments; ease of maintenance with a new surface treatment and a consistent smooth appearance.
Exclusive Précontraint® Ferrari® technology

Made using the exclusive patented Ferrari® Précontraint® technology, Précontraint® 502 textiles are manufactured under equal tension throughout the manufacturing cycle.

The result of that is — exceptional dimensional stability — perfect tensioning and finish — shape that is retained at installation and over time — long-lasting mechanical resistance — substantially extended lifespan — exceptional flexibility that ensures architectural freedom and ease of fitting.

Greater coating thickness over the surface of the yarns
Thicker coating on the thread crests ensures that the physical properties of Ferrari® Précontraint® membranes are preserved over time — a key factor in the durability of your projects.

Technical features

**Precontraint® 502**

- Long life
- Tear resistance
- Dimensional stability
- UV resistant
- Won't sag
- Easy maintenance
- Flexibility
- Flame retardant
- Thermal comfort
- Graphic Customization
- Creative Freedom
- 100% recyclable textile

**Solar and light properties**

(according to EN 14501)

The colours and textures represented in this digital image are provided as a reference only. Whether seen on a screen or printed, they cannot in any way match the actual item. We recommend procuring an actual sample when specifying these products.

**Emerging colours**

Promoting a strong urban harmony, featuring neutral discreet shades, such as Mastic, Concrete and Cornflower. Aluminium and Shifting Grey being more sophisticated shades.
Design illusion

Contemporary architecture ventures towards dynamic, almost fluorescent colours that have a strong presence. This bright, saturated colour harmony strongly reflects a current trend, in which every contrast is possible.

Evolving with time

The first impression is that these colours appear to be taken directly from nature’s palette; evoking the continuous cycle of the plant world. Looking deeper, these colours appear smarter and more refined, reminding us of certain Art Nouveau paintings.
A palette taking inspiration from a variety of flesh tones, from Champagne, through Pale Pink to Cocoa. These colours are soft and mellow, reflecting neutrality, remaining discreet, sober and subtle.

**Body language**

A palette taking inspiration from a variety of flesh tones, from Champagne, through Pale Pink to Cocoa. These colours are soft and mellow, reflecting neutrality, remaining discreet, sober and subtle.

**Mayhem**

Enter a strange satanic nocturnal world. Colouring is ambiguous, Slate changes from black to violet… It’s perturbing to see blood reds in the range.
